Attorney Docket: 112.P77035

JAN 03 2007

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application. Where claims have been amended and/or canceled, such amendments and/or cancellations are done without prejudice and/or waiver and/or disclaimer to the claimed and/or disclosed subject matter, and the applicant and/or assignee reserves the right to claim this subject matter and/or other disclosed subject matter in a continuing application.

1. (Currently Amended) A command input device for use with a digital data processing system and a portable communication apparatus, comprising:

a signal connector capable of detachably plugged to plugging into a socket of said portable communication apparatus; and

a command generator ~~electrically connected~~ coupleable to said signal connector and capable of asserting a command signal to said digital data processing system via local wireless transmission modules of said portable communication apparatus and said digital data processing system, ~~wherein the command generator does not have any wireless transmission module.~~

2. (Currently Amended) The command input device according to claim 1 wherein said local wireless transmission modules of said portable communication apparatus and said digital data processing system are comprise one or more devices selected from a group consisting of bluetooth transmitters, bluetooth receivers and ~~[[or]]~~ bluetooth transceivers.

3. (Currently Amended) The command input device according to claim 1

10/697,730

Attorney Docket: 112.P77035

wherein said command generator ~~obtains~~ is adapted to receive electrical power from said portable communication apparatus ~~via said signal connector~~.

4. (Original) The command input device according to claim 1 wherein said command generator is selected from a group consisting of a cursor-control module, a game pad module and a keyboard module.

5. (Original) The command input device according to claim 1 wherein said signal connector is selected from a group consisting of an RS 232 signal connector, a universal serial bus (USB) connector, and an IE 1394 signal connector.

6. (Currently Amended) The command input device according to claim 1 wherein said digital data processing system [[is]] comprises a device selected from a group consisting ~~one~~ of a personal computer and a video game system.

7. (Currently Amended) The command input device according to claim 1 wherein said portable communication apparatus [[is]] comprises a device selected from a group consisting ~~one~~ of a cell phone and a personal digital assistant.

8. (Currently Amended) A communication system, comprising:
a portable communication apparatus ~~for~~ capable of communicating with a base station, said portable communication apparatus having a first local wireless transmission module;
a personal computer having a second local wireless transmission module; and

10/697,730

Attorney Docket: 112.P77035

a command input device ~~combinable~~ capable of being combined with said portable communication apparatus, and further capable of asserting a command signal to said second local wireless transmission module of said personal computer via said first local wireless transmission module of said portable communication apparatus, wherein ~~the~~ said command input device does not have any wireless transmission module.

9. (Currently Amended) The communication system according to claim 8 wherein said first and said second local wireless transmission modules ~~are~~ comprise one or more devices selected from a group consisting of bluetooth transmitters, bluetooth receivers, and ~~[[or]]~~ bluetooth transceivers.

10. (Currently Amended) The communication system according to claim 8 wherein said portable communication apparatus ~~[[is]]~~ comprises a device selected from a group consisting ~~one~~ of a cell phone and a personal digital assistant.

11. (Currently Amended) The communication system according to claim 8 wherein said command input device is connectable ~~combined~~ with said portable communication apparatus via a signal connector.

12. (Currently Amended) The communication system according to claim 11 wherein said portable communication apparatus ~~supplies~~ is adapted to supply electrical power to said command input device via said signal connector.

13. (Original) The communication system according to claim 11 wherein said

10/697,730

Attorney Docket: 112.P77035

signal connector is selected from a group consisting of an RS 232 signal connector, a universal serial bus (USB) connector and an IE 1394 signal connector.

14. (Currently Amended) The communication system according to claim 8 wherein said command input device is integrated into said portable communication apparatus and ~~disposed on the housing with said portable communication apparatus.~~

15. (Original) The communication system according to claim 8 wherein said command input device is selected from a group consisting of a cursor control device, a game pad and a keyboard.

16-20. (Cancelled)

21. (New) A method of transmitting an input signal received at a command input device to a digital data processing system, comprising:

in response to said input signal, generating a command signal from a command generator of said command input device and providing said command signal to a portable communication device through a signal connector; and

transmitting the command signal from the portable communication device to said digital data processing system via a wireless interconnect.

22. (New) The method of claim 21, wherein the wireless interconnect uses a bluetooth standard.

23. (New) The method of claim 22, further comprising providing power to the

10/697,730

Attorney Docket: 112.P77035

command input device from the portable communication device through the signal connector.

24. (New) The method of claim 23, wherein the signal connector is selected from a group consisting of an RS 232 signal connector, a universal serial bus (USB) connector, and an IE 1394 signal connector.

25. (New) The method of claim 24, wherein the digital data processing system comprises a device selected from a group consisting of a personal computer and a video game system.

26. (New) The method of claim 25, wherein the portable communication apparatus comprises a device selected from a group consisting of a cell phone and a personal digital assistant.

27. (New) The command input device according to claim 3, wherein the digital data processing system comprises a device selected from a group consisting of a personal computer and a video game system.

28. (New) The command input device according to claim 1, wherein said command generator is adapted to receive electrical power from said portable communication apparatus via said signal connector.

29. (New) A method of transmitting a command input at a peripheral device to a computer, comprising:

10/697,730

Attorney Docket 112.P77035

in response to said command input, generating a command signal from a command generator of said peripheral device and providing said command signal to a portable communication device through a signal connector; and

transmitting the command signal from the portable communication device to said computer via a bluetooth interconnect.
